

## Self-sealing adhesive for PVC

**CODES:** CF103 | CF105 | CF108

### Self-sealing adhesive for PVC replacement

The company has taken steps to replace the self-sealing adhesive for PVC brand Korafit. The adherent will replace the previous one in its 3 presentations, the new self-sealing is GRIFFON from the BOSTIK UHU group. Diverse of the previous adherent, the new one, in packs of 250 gr and 500 gr, is distributed into plastic containers; ensuring, thus, a better insulation and a longer shelf life over time. In addition, the brush of these two packs is turning, thereby improving considerably the application on PVC tubes.

The commercial codes, EAN 13 and prices will remain unchanged.
