

SCELTA DEL MODELLO DI ADATTATORI

Per l'installazione del CMT800 è necessario il supporto placca 3 moduli della serie elettrica utilizzata. Su ogni adattatore è stampato il nome della serie elettrica. Scegliere la coppia di adattatori corrispondente alla serie elettrica utilizzata.

ESEMPIO *Serie elettrica* **VIMAR PLANA**
 Supporto placca **VIMAR PLANA**
 Adattatori **VIMAR PLANA**

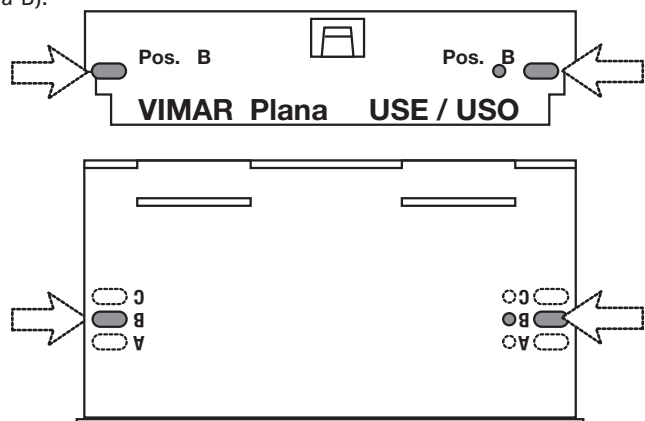

MONTAGGIO DEGLI ADATTATORI

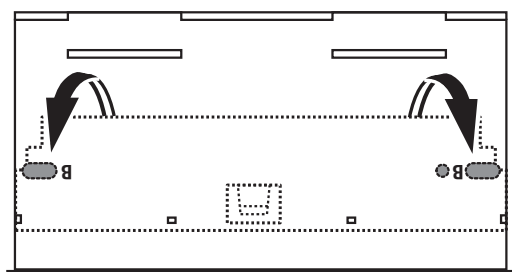

1
Prendere la coppia di adattatori della serie elettrica in uso. Leggere la lettera (in questo esempio la B) che indica la posizione di inserimento dei centratori (R) e (L).

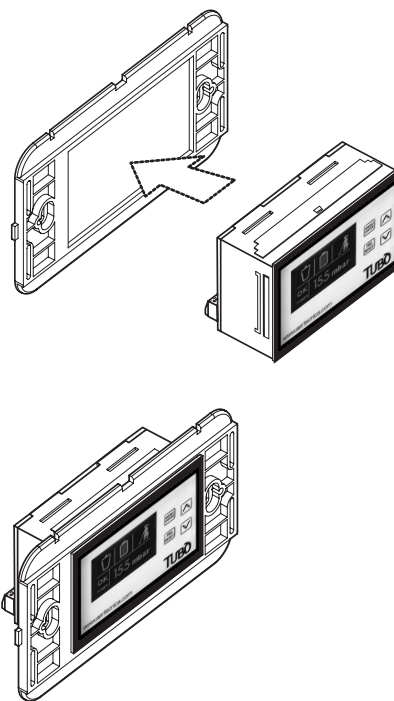

2
Prendere il CMT800 e allineare l'adattatore in modo che i centratori siano in corrispondenza dei fori indicati dalla lettera (in questo esempio la B).

3
Ribaltare l'adattatore e inserire i centratori nel CMT800. Ripetere l'operazione sull'altro lato del CMT800.

4
Inserire il CMT800 con gli adattatori nel supporto placca 3 moduli della serie elettrica utilizzata e completare l'installazione.

SELECTING THE ADAPTOR MODEL

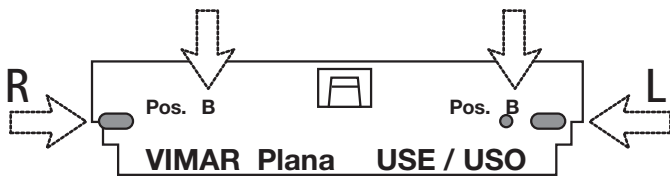

CMT800 installation requires the 3 module switch plate support that corresponds to the utilised electrical series. The name of the electrical series is printed on each adaptor. Select a pair of adaptors that corresponds to the utilised electrical series.

EXAMPLE *Electrical series* **VIMAR PLANA**
 Switch plate support **VIMAR PLANA**
 Adaptors **VIMAR PLANA**

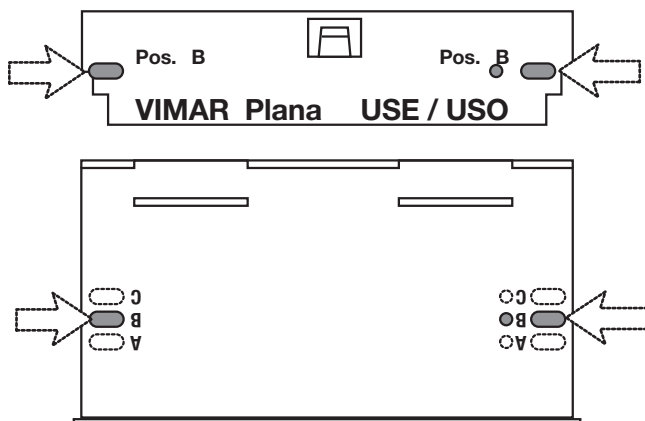

ASSEMBLING THE ADAPTORS

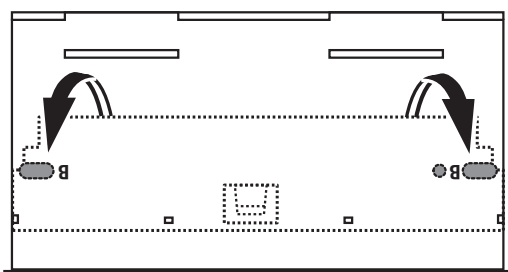

1
Take the pair of adaptors for the electrical series in use. Read the letter (for example, B) that indicates the position for inserting the centring devices (R) and (L).

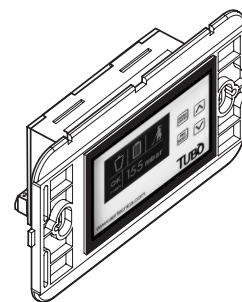

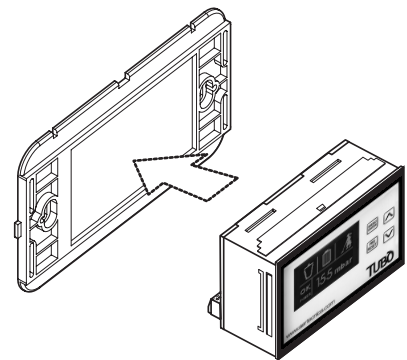

2
Take the CMT800 and align the adaptor so that the centring devices correspond to the holes indicated by the letter (in this example, B).

3
Turn over the adaptor and insert the centring device in the CMT800. Repeat the operation on the other side of the CMT800.

4
Insert the CMT800 with the adaptors in the 3 module switch plate support for the electrical series that is used and complete the installation.

WAHL DES ADAPTERMODELLS

Für den Einbau des CMT800 ist die Abdeckrahmenhalterung 3 Module der verwendeten elektrischen Serie notwendig. Auf jedem Adapter ist der Name der elektrischen Serie eingestanzt. Wählen Sie das der verwendeten elektrischen Serie entsprechende Adapterpaar.

BEISPIEL *Elektrische Serie* **VIMAR PLANA**
 Abdeckrahmenhalterung **VIMAR PLANA**
 Adapter **VIMAR PLANA**

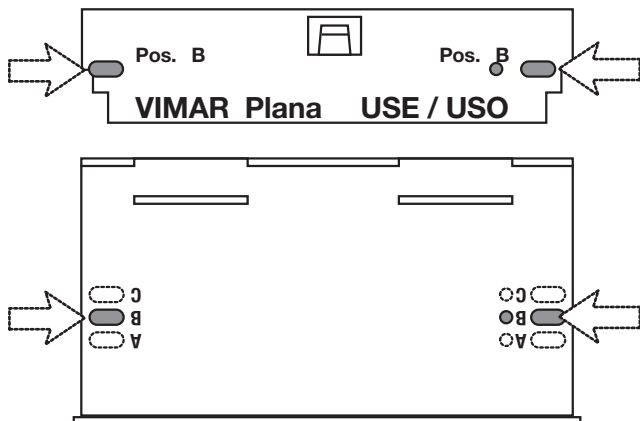

EINBAU DER ADAPTER

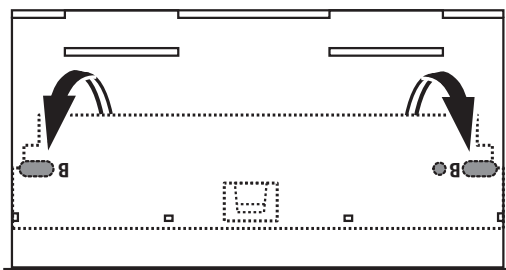

1
Das Adapterpaar der verwendeten elektrischen Serie aufnehmen. Den Buchstaben (in diesem Beispiel B) ablesen, der die Einsetzposition der Zentrierer (R) und (L) anzeigt.

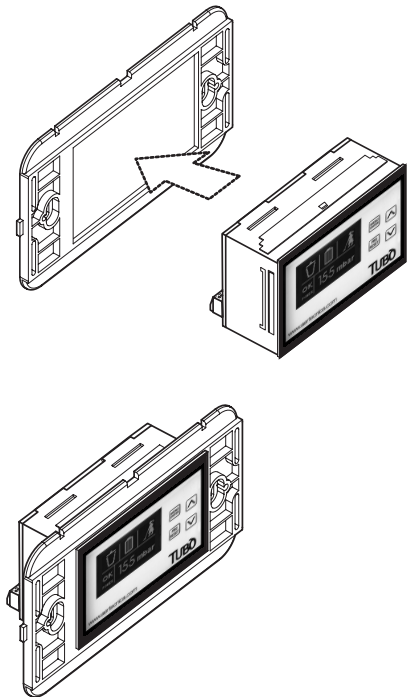

2
Den CMT800 aufnehmen und den Adapter so ausrichten, dass sich die Zentrierer auf der Höhe der vom Buchstaben (in diesem Beispiel B) angezeigten Bohröffnungen befindet.

3
Den Adapter abkippen und die Zentrierer im CMT800 einsetzen. Den Vorgang auf der anderen Seite des CMT800 wiederholen.

4
Den CMT800 mit den Adaptern in der Abdeckrahmenhalterung 3 Module der verwendeten elektrischen Serie einsetzen und den Einbau abschließen.

CHOIX DU MODÈLE DES ADAPTATEURS

Pour l'installation du CMT800 est nécessaire le support de plaque à 3 modules de la série électrique utilisée. Sur chaque adaptateur est imprimé le nom de la série électrique. Choisir la paire d'adaptateurs correspondant à la série électrique utilisée.

EXEMPLE Série électrique **VIMAR PLANA**
Support de plaque **VIMAR PLANA**
Adaptateurs **VIMAR PLANA**

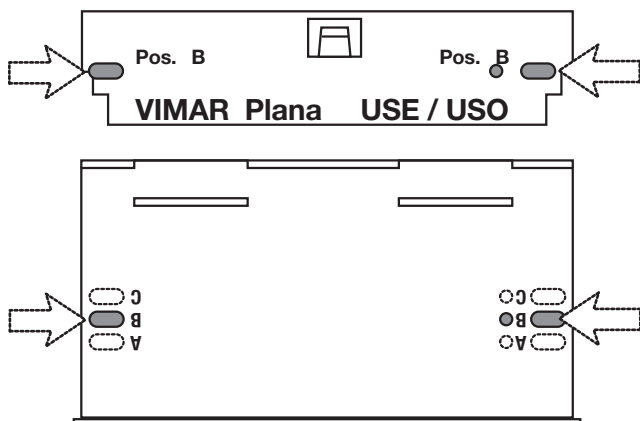

MONTAGE DES ADAPTATEURS

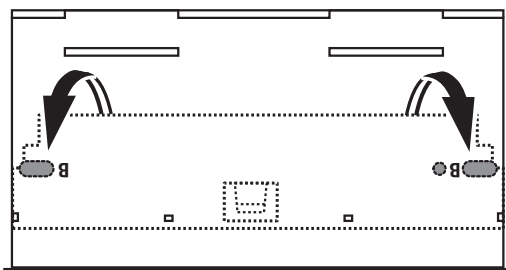

1
Prendre la paire d'adaptateurs de la série électrique utilisée. Lire la lettre (dans cet exemple le B) qui indique la position d'insertion des centres (R) et (L).

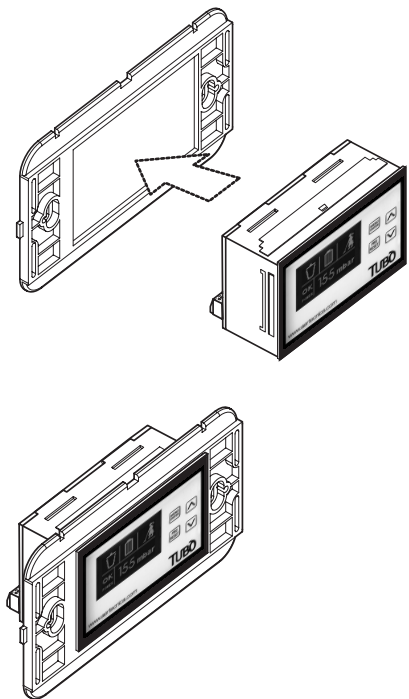

2
Prendre le CMT800 et aligner l'adaptateur de manière à ce que les centres soient à la hauteur des trous indiqués par la lettre (dans cet exemple le B).

3
Retourner l'adaptateur et insérer les centres dans le CMT800. Répéter l'opération sur l'autre côté du CMT800.

4
Insérer le CMT800 avec les adaptateurs dans le support de plaque à 3 modules de la série électrique utilisée et compléter l'installation.

ELECCIÓN DEL MODELO DE LOS ADAPTADORES

Para instalar el CMT800 se necesita el soporte de placa de 3 módulos de la serie eléctrica utilizada. Cada adaptador lleva impreso el nombre de la serie eléctrica. Elija el par de adaptadores correspondiente a la serie eléctrica utilizada.

EJEMPLO *Serie eléctrica* **VIMAR PLANA**
Soporte de placa **VIMAR PLANA**
Adaptadores **VIMAR PLANA**

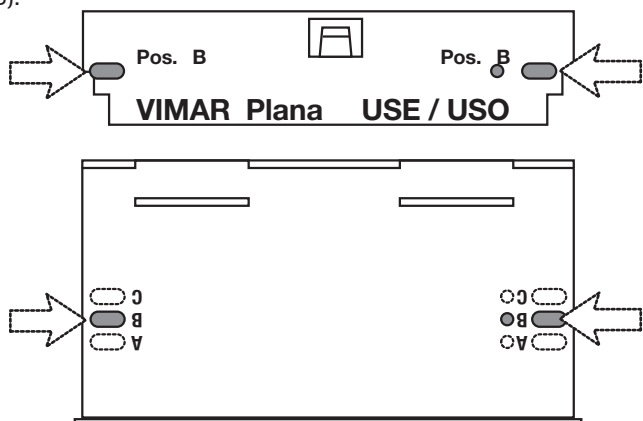

MONTAJE DE LOS ADAPTADORES

1
Tome el par de adaptadores de la serie eléctrica utilizada. Observe la letra (en este ejemplo la B) que indica la posición de introducción de los centradores (R) y (L).

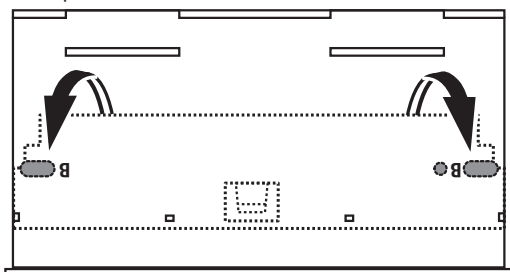

2
Tome el CMT800 y alinee el adaptador de manera que los centradores coincidan con los orificios indicados por la letra (en este ejemplo la B).

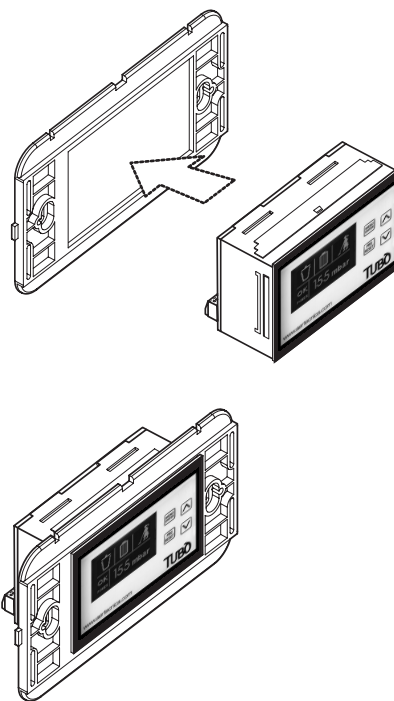

3
Ponga el adaptador en horizontal e introduzca los centradores en el CMT800.

Repita esta operación en el otro lado del CMT800.

4
Introduzca el CMT800 con los adaptadores en el soporte de placa de 3 módulos de la serie eléctrica utilizada y complete la instalación.

ESCOLHA DO MODELO DOS ADAPTADORES

Para a instalação do CMT800 é necessário o suporte placa 3 módulos da série eléctrica utilizada. Em cada adaptador está imprimido o nome da série eléctrica. Escolha o par de adaptadores correspondente à série eléctrica utilizada.

EXEMPLO *Série eléctrica* **VIMAR PLANA**
Suporte placa **VIMAR PLANA**
Adaptadores **VIMAR PLANA**

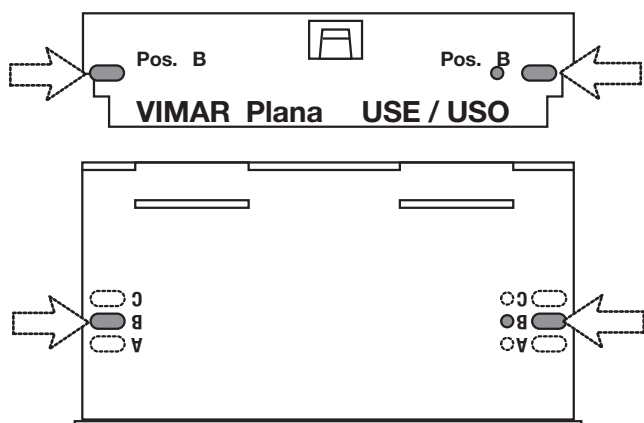

MONTAGEM DOS ADAPTADORES

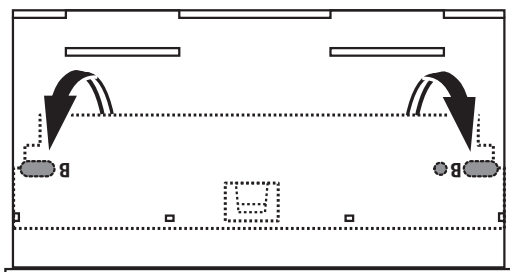

1
Pegue no par de adaptadores da série eléctrica usada actualmente. Leia a letra (neste exemplo a B) que indica a posição de introdução dos centradores (R) e (L).

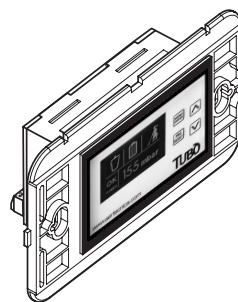

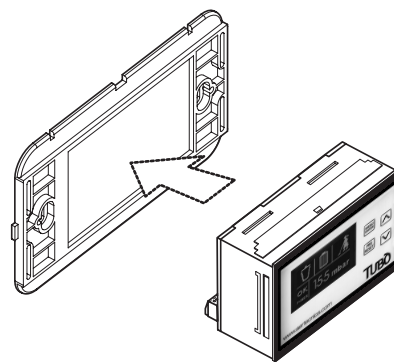

2
Pegue no CMT800 e alinhe o adaptador de modo que os centradores fiquem ao nível dos furos indicados pela letra (neste exemplo a B).

3
Vire o adaptador e insira os centradores no CMT800. Repita a operação do outro lado do CMT800.

4
Insira o CMT800 com os adaptadores no suporte placa 3 módulos da série eléctrica utilizada e complete a instalação.
